PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building and deploying frontend web applications for real clients. Currently expanding across the full stack with React, Node.js, Express, and PostgreSQL. QA and process analysis background brings a detail-oriented, systematic approach to writing clean, testable code. EAD, no sponsorship required. Open to Bay Area and remote roles.

EDUCATION

Codecademy <i>Full-Stack Engineer Program.</i>	USA, Online 2026
Universitat Oberta de Catalunya <i>Digital Interaction and Multimedia (2 years completed).</i>	Spain 2023

EXPERIENCE

Quality Assurance Specialist <i>ISGF</i>	Mar 2017 – Aug 2023 <i>Spain</i>
- Monitored and evaluated call and interaction quality across 6 teams totaling approximately 72 agents, coaching operators and managers on structured compliance and customer satisfaction guidelines. - Reduced repeat customer contacts by introducing more frequent follow-up touchpoints for open incidents and implementing post-call SMS summaries outlining resolution steps, improving customer confidence and lowering callback rates. - Built and maintained documentation standards to ensure consistency and traceability across quality processes.	
Customer Relations Executive <i>Atento</i>	Mar 2005 – Jun 2014 <i>Spain</i>
- Managed a dedicated portfolio of corporate accounts, serving as the primary point of contact for business clients responsible for their company's mobile and internet services. - Handled inbound and outbound calls to address account needs including line additions and cancellations, billing queries, and service restructuring. - Built ongoing relationships with account holders to ensure timely resolution of requests and continuity of service.	

PROJECTS

Full-Stack Task Manager App https://ai-dashboard-ui-liart.vercel.app/	
- Building a full-stack CRUD application with user authentication, a React frontend scaffolded with Vite and Zustand for state management, and a RESTful Node/Express backend connected to a PostgreSQL database; frontend currently live at the link above. - Implementing JWT-based authentication, protected routes, and a responsive UI with component-based architecture. - Deployed frontend via Vercel; backend integration in progress.	
UC Berkeley Lab Website https://diamondlab.bio/	2025 – 2025
- Designed and developed a production frontend website for a real research laboratory client, from stakeholder brief to deployment. - Built responsive layouts compatible across desktop, tablet, and mobile; created modular and reusable UI components. - Managed project lifecycle using Git and GitHub; deployed and maintained via Netlify.	
Developer Portfolio https://gbielbellamy.github.io	
Designed and built a personal portfolio showcasing multiple projects; visit the site to see the full range of work, including interactive UI elements and accessibility improvements.	

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks and Libraries: React, Vite, Zustand, Node.js, Express.js
Databases: PostgreSQL, REST API Development
Tools: Git, GitHub, Netlify, Vercel, Render, VS Code, Chrome DevTools
Testing: Playwright, Vitest
Spoken Languages: Spanish (Native), Catalan (Native), French (Native), English (Professional)
