

Gabriel Bellamy

Full-Stack Engineer

Berkeley, CA | +1 (650) 313-7933 | gbielbellamy@gmail.com | linkedin.com/in/gbielbellamy | github.com/gbielbellamy | gbielbellamy.github.io

PROFILE

Full-Stack Engineer with hands-on frontend experience building and deploying web applications using JavaScript, TypeScript, React, Vite, and Zustand. Recent work includes Northstar, a career-transition management platform with a custom design system, complex state management, and data visualization. I also build and maintain a live production website for the Diamond Lab (UC Berkeley's Innovative Genomics Institute). Backed by over 15 years of progressively senior experience in customer operations and quality assurance, including leading a team of 12 and managing quality oversight across 6-7 teams, I bring proven leadership, structured problem-solving, and experience taking projects from first requirements to live delivery. Trained in full-stack fundamentals (Node.js, Express, PostgreSQL, REST APIs, JWT, automated testing) through Codecademy's Full-Stack Engineer Program. Authorized to work in the U.S. (EAD, no sponsorship required) and open to full-stack, frontend, and junior software engineer roles in the Bay Area and remote.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React, Vite, Zustand, Framer Motion, Recharts, Responsive Design, Component-Based Architecture, Design Systems

Tools: Git, GitHub, VS Code, Chrome DevTools, Netlify, Vercel, GitHub Pages

Full-Stack Fundamentals (Codecademy coursework): Node.js, Express.js, PostgreSQL, SQL, REST APIs, JWT Authentication, Vitest, Playwright

Spoken Languages: Spanish (Native), Catalan (Native), French (Native), English (Professional)

EXPERIENCE

Freelance Frontend Developer · Diamond Lab (Innovative Genomics Institute, UC Berkeley), Berkeley, CA (Hybrid) Nov 2024 – Present

- Designed and developed a production website for the Diamond Lab, sole developer from initial brief to live deployment.
- Worked directly with the lab's principal investigator through iterative design reviews, incorporating feedback to shape the site's structure and content.
- Reached a perfect Lighthouse accessibility score; continue to provide ongoing support and updates as needed.
- Used Git/GitHub for version control; deployed and maintained the site via Netlify.

Quality Assurance Analyst · ISGF, Spain Mar 2017 – Aug 2023

- Progressed from customer support agent to Team Leader, leading a team of 12 agents: auditing calls, building performance improvement plans, and running briefings. Later moved into the Quality department.
- Managed quality oversight across 6-7 teams on-site, resolving agents' questions on call handling and KPI structures, and auditing calls to build improvement action plans.
- Collaborated with the broader quality team to identify weak areas and adjust processes according to client requirements.
- Built and maintained documentation standards to ensure consistency and traceability across quality processes.

Customer Relations Executive · Atento, Spain Mar 2005 – Jun 2014

- Provided front-line customer service for Movistar accounts in a high-volume call center before progressing to managing a dedicated portfolio of corporate accounts.
- Resolved incidents and coordinated technical installations and equipment solutions for business clients' mobile and internet services.
- Handled billing inquiries, line changes, cancellations, and service restructuring requests.
- Built long-term relationships with account holders, ensuring timely resolution and continuity of service.

PROJECTS

Northstar: Career Transition Platform

React 19 · TypeScript · Vite · Zustand · Recharts · Framer Motion

- Building a career-transition management platform to plan, track, and evaluate my own job search, covering the daily schedule, application and networking tracking, a 10-week roadmap, and a skills library.
- Designed a custom design system from scratch (design tokens, dark mode, switchable typefaces) and a reusable component library.
- Built a Zustand store with persistence, data migration, and versioned plan-merging logic; data visualized with Recharts.

Job Application Tracker

HTML5 · CSS3 · JavaScript

- Built a dependency-free web app to track job applications, with status tracking, follow-up reminders, response-rate stats, filtering, and search.
- Implemented JSON export/import for data portability, with no backend or account required.

Developer Portfolio | gbielbellamy.github.io

HTML5 · CSS3 · JavaScript · GitHub Pages

- Designed and built a personal portfolio website to showcase full-stack projects, including interactive UI elements and accessibility improvements.

EDUCATION

Full-Stack Engineer Program · Codecademy, Online, USA

May 2026

Bachelor's Degree, Digital Interaction and Multimedia · Universitat Oberta de Catalunya, Spain *Sep 2020 – Jun 2022*
